

Grade Level	<p align="center"><b>An Ocean of Color - Coral Reefs Coastfest Art</b>  <b>Art Lessons 08/26/24 to 09/13/24</b>  <a href="#">Click here for Art Standards K-5</a></p>
<b>K</b>	<p>Standard(s): VAK.CR.2 Create works of art based on selected themes VAK.CN.2 Integrate information from other disciplines to enhance the understanding &amp; production of works of art.            LT: I can create a work of art inspired by Coastfest and our coastal marine life. .            SC: You do/we do/I do use inspiration from our Georgia coast to create artwork of coral reefs and fish habitats to highlight the importance of marine ecology.            Lesson/Activity: An Ocean of Color - Coral Reefs. The ocean on our GA coast is our inspiration. We learn that fish habitats are important for keeping fish safe from predators. Our coast has artificial and natural reef's such as Gray's Reef which is what we looked at to paint our fish habitats that show texture and fish life. Artists will draw inspiration from the video about Gray's Reef and by guided painting and including things that make texture in paints, such as bubble wrap and stamps.            *Rubric - Teacher will walk around observing if students are using texture in their paintings to emulate the roughness of the coral reefs by creating shapes and using practiced paint techniques creating texture. Teacher will observe the value of shades of blue and light colored paint in student work.            Differentiation will occur with different style of artwork and paint techniques or thicker paintbrushes            Vocabulary - elements of art, coral reefs, artificial reef, natural reef, habitat, texture, color value</p>
